DETAILED ACTION

Response to Amendment

1. This action is in response to amendment filed January 30th, 2003.

REASONS FOR ALLOWANCE

2. Claims 1-3 & 5-26 are allowable over the prior art.
3. The following is an examiner's statement of reasons for allowance:

With respect to claim 1, Shirakawa et al disclose a device for an optical connector comprising a light-emitting and light-receiving module. The light-receiving module (7) comprises a light-receiving element embedded within a molded portion (51) made of a transparent material capable of transmitting light (see column 8, lines 30-38). The molded portion (51) serves as a two-dimensional optical waveguide layer allowing the embedded light-receiving element to receive light propagating within a plane of the molding without any directional dependence in that it can receive light from different angles and either from the front or back of the light-receiving module. However, molded portion (51) does not allow the light signal to propagate in a plurality of directions. As a result, independent claim 1 and dependent claims 2-3 & 5-9 are allowable over the prior art. Claims 10-26 are allowable for reasons previously indicated.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion
